Foundations

A focused visual language for landing pages. Existing navy, teal and Inter assets, organized into reusable decisions—not a finished marketing website.

01 Foundations · 02 Controls · 03 Content · 04 Section patterns

Existing assets first
17 linked paint styles. 28 linked landing-page text styles. Keep their identities; do not duplicate them as new colors.

One coherent hierarchy
Navy carries actions and headings. Teal supports emphasis. Off-White and Off-Black provide the editorial base.

Responsive by composition
Desktop and mobile specimens are native auto-layout components with variants and editable content. Content order is preserved as rows become stacks.

01.1 / Color inventory

All swatches reference existing paint styles. Hex values below are documentation only. Secondary is the working accent; Accent styles remain available for exceptional emphasis.

Primary/Dark	#071A32	Pressed / deep surface
Primary/Default	#0B2545	CTA / heading / focus
Primary/Light	#A1C3EB	Border / disabled surface
Secondary/Dark	#00534B	Hover / readable teal
Secondary/Default	#00A896	Accent / decorative fill
Secondary/Light	#8BD8D0	Hover tint / accent badge
Accent/Dark	#013D46	Reserved emphasis
Accent/Default	#028090	Reserved emphasis
Accent/Light	#92D4DD	Reserved tinted surface
Error/Dark	#DC2626	Invalid field / error text
Error/Light	#FEF2F2	Error message background
Success/Dark	#16A34A	Success icon / border
Success/Light	#F0FDF4	Confirmation surface
Warning/Dark	#D97706	Caution icon / border
Warning/Light	#FFFBEB	Caution surface
Off-White	#F8FAFC	Canvas / inverse label
Off-Black	#111111	Body copy

01.2 / Approved pairings

Readable combinations for copy and controls. Do not use Off-White text on Secondary/Default, Success/Dark or Warning/Dark for normal body text.

Aa / 123	Primary / Off-White	Main CTA and inverse sections
Aa / 123	Off-White / Off-Black	Long-form copy and card bodies
Aa / 123	Secondary Light / Dark	Badges and tinted surfaces
Aa / 123	Success Light / Primary	Confirmation copy + success icon

01.3 / Inter type matrix

All 14 roles use the existing Landing Page/Desktop and Landing Page/Mobile styles and token bindings. D / M = desktop / mobile; size / line height in px, then weight and tracking. No Enterprise typography. Visual style names do not dictate HTML semantics.

ROLE / USAGE	DESKTOP	MOBILE
Hero Display (XL) D 64 / 70.4 · M 40 / 44 700 weight · −2% tracking Primary hero; one per page.	Clear by design	Clear by design

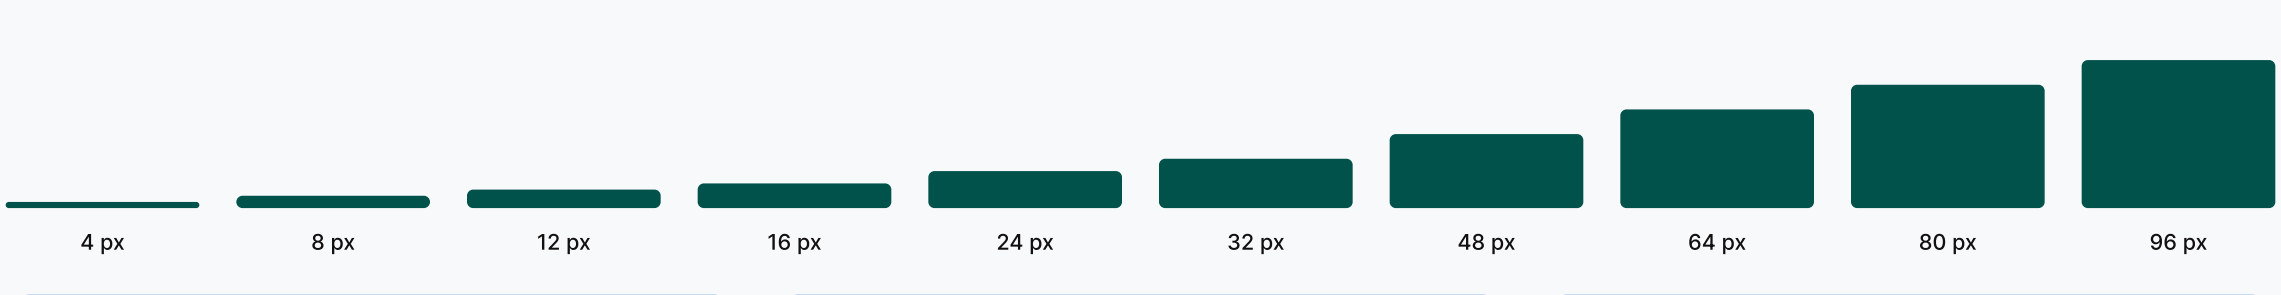
01.4 / Space, shape and depth

Small non-color scales, used throughout these specimens. 28 shared foundation variables cover spacing, radii, borders, control sizes, focus offset and layout. Values are in px; no new palette assets.



Spacing usage
4 icon details · 8 label gaps · 12 compact padding · 16 body rhythm · 24 card padding · 32 mobile sections · 48 desktop sections · 64 atlas gutters · 80 hero · 96 major separation.

Radii and borders
4 checkbox · 8 controls · 12 offset focus ring · 16 cards · 999 pill badges. 1 px baseline border; 2 px focus and featured emphasis. Borders bind to existing paint styles.

Elevation
Level 0 only: flat surfaces and clear outlines. Hover uses a stronger border or existing tint, not a new shadow color. No shadow token is needed for this system.

4 px · 8 px · 16 px · Pill / 999

01.5 / Layout and accessibility

Compositional rules—not a website template. Adapt layout at the point content no longer fits, rather than shrinking controls or text.

Desktop layout
Reference viewport 1440; maximum content 1200; 64 px outer inset minimum; 12-column grid with 24 px gaps. Section specimens use a compact 960 px desktop canvas with 48 px insets.

Mobile layout
Reference viewport 390; 24 px gutters; 4-column grid with 16 px gaps. Stack below 768; preserve reading order. Comfortable body measure 45–75 characters; never clip meaningful content.

Fluid content
Use fill-parent for text and form fields; hug for labels and badges. Cards share row height. Sections hug their contents; buttons can stretch on mobile. Test 320 px and 200% text zoom.

Focus and targets
2 px Primary/Default outline, 2 px clear offset. Never remove visible keyboard focus. Controls and link hit areas are 48 px high; checkbox glyphs are 24 px inside a 48 px target.

Contrast and meaning
Verify 4.5:1 for normal text; 3:1 for large text and meaningful UI boundaries. Light borders alone are decorative; maintain dark labels. Pair error and success colors with icon + explicit message.

Interaction semantics
Use real buttons, links, labels and disclosure semantics in production. FAQ exposes expanded state; menus expose open state. Disabled controls are unavailable; loading keeps the label and announces progress. No motion or wiring is implied.

Controls & states

Small, purposeful interactions for public-facing landing pages. State matrices make behavior visible; every candidate is an editable sibling frame.

01 Foundations · 02 Controls · 03 Content · 04 Section patterns

Button

Axes: Hierarchy × State × Viewport. Reading order per row: default / hover / pressed / focus / disabled / loading. 48 px targets, 24 px horizontal inset, 8 px radius. One primary CTA per decision area; never change button width when loading.

DESKTOP / PRIMARY · DEFAULT / HOVER / PRESSED / FOCUS / DISABLED / LOADING

MOBILE / TERTIARY · DEFAULT / HOVER / PRESSED / FOCUS / DISABLED / LOADING

Get started · Get started · Get started · Get started · Get started · Get started

USAGE / MOBILE USES ITS LINKED LABEL STYLE. STRETCH THE FRAME TO THE AVAILABLE COLUMN WIDTH WHEN USED AS THE MAIN ACTION. TERTIARY IS A BUTTON, NOT A TEXT HYPERLINK.

Text Link

Axis: State. Reading order: default / hover / focus / disabled. Use for navigation to another destination. Keep descriptive link text; do not rely on color alone. Disabled links retain readable text but are not actionable.

DEFAULT / HOVER / FOCUS / DISABLED · 48 PX HIT AREA, PERSISTENT UNDERLINE

Read the guide ↗ · Read the guide ↗ · Read the guide ↗ · Read the guide ↗

Navigation Link

Axis: State. Reading order: default / hover / active / focus. Use only in header and footer navigation. Active uses a persistent tint and underline; mark the current page semantically in production.

DEFAULT / HOVER / ACTIVE / FOCUS · 48 PX TARGET

Overview · Overview · Overview · Overview

Badge

Axis: Tone. Neutral identifies metadata; accent highlights a single meaningful attribute. Non-interactive; never use a badge as the only indicator of status.

NEUTRAL / ACCENT · 8 PX VERTICAL, 16 PX HORIZONTAL INSET, PILL RADIUS

Illustrative · Illustrative

Text Input

Axis: State. Reading order: default / hover / focus / filled / error / disabled. Always retain the visible label and helper message. 48 px input height; preserve entered values on error. Pair the error border with an icon and actionable guidance.

DEFAULT / HOVER / FOCUS

FILLED / ERROR / DISABLED

Email address you@example.test For occasional updates. Unsubscribe anytime.	Email address you@example.test ⓘ For occasional updates. Unsubscribe anytime.	Email address you@example.test For occasional updates. Unsubscribe anytime.

Checkbox

Axis: State. Reading order: unchecked / checked / focus / disabled. Optional newsletter consent only; never preselect consent. The entire 48 px row is the target. Glyph is 24 px; label remains editable.

UNCHECKED / CHECKED / FOCUS / DISABLED

☐ Send me occasional updates · ☑ Send me occasional updates · ☐ Send me occasional updates · ☐ Send me occasional updates

State is more than color

Focus is an explicit 2 px navy outline. Hover and pressed remain distinct from persistent active state. Disabled controls are excluded from interaction; loading reserves its original width and exposes a progress announcement in production.

Use a logical tab order, associate labels and helper messages with fields, and announce validation after submission. These are static state specimens, not wired interactions.

Content components

A reusable editorial vocabulary for explanation, proof and decision-making. Content is deliberately illustrative; no real company claims or endorsements.

01 Foundations · 02 Controls · 03 Content · 04 Section patterns

FAQ Item

Axis: State. Collapsed / expanded / focus. Use one question per item, a 48 px minimum question target and a concise answer. Production disclosure exposes aria-expanded; this focus specimen is collapsed.

COLLAPSED / EXPANDED / FOCUS · CONTENT-DRIVEN HEIGHT

Can I adapt this example? +

Can I adapt this example? –
Yes. Replace the illustrative copy with your own content, keep a clear hierarchy, and choose only the sections your landing page needs.

Can I adapt this example? +

Feature Card

Axis: State. Default / hover. Icon, title, body and supporting action remain separate editable layers. Use 2–3 cards per desktop row, one per mobile row; keep copy similar in length. Only show hover when the card or its action is interactive.

DEFAULT / HOVER · 24 PX PADDING, 16 PX RADIUS, NO SHADOW

A flexible foundation
Start with a considered set of building blocks. Adapt the content without losing the visual rhythm.

Testimonial Card

Single specimen: Variant=Default. Quote and attribution form one unit. Use verified quotes and permissions in real content; the quotation below is invented to demonstrate layout.

DEFAULT · ILLUSTRATIVE QUOTE, NOT AN ENDORSEMENT

> “The page finally had a clear rhythm. Every section made the next step easier to understand.”
>
> AL Alex Lee
> Designer · fictional attribution

Pricing Card

Axis: Variant. Default / featured. Use for a simple landing-page plan comparison, not a commerce flow. Featured adds an explicit badge and 2 px border, not color alone. Keep feature rows and actions aligned when placed together.

DEFAULT / FEATURED · ALL PRICES AND PLAN DETAILS ARE EXAMPLES

Starter
$12 / month · illustrative

Stat

Single specimen: Variant=Default. Value, label and context are independently editable. Use factual, sourced numbers in production; the example counts a hypothetical process, not a performance claim.

DEFAULT · NEVER PUBLISH AN UNVERIFIED METRIC

03
Simple steps
Illustrative process count

Section Heading

Axes: Alignment × Viewport. Desktop left / center, then mobile left / center. Use the linked H1 visual style for section titles; match heading semantics to page hierarchy. Eyebrow is optional, description should clarify—not repeat—the title.

DESKTOP / LEFT / CENTER · 672 PX SPECIMEN; CONSTRAIN TEXT MEASURE IN WIDER SECTIONS

THE APPROACH

A short introduction connects the section title to the useful details that follow.

Compose with purpose, not every component

Choose feature cards to explain, testimonials to support, FAQ items to resolve uncertainty and pricing to compare. A landing page does not need all of them. Keep claims truthful, actions specific and text editable.

Responsive patterns

Six independent section recipes, not one assembled website. Each desktop and mobile example shows how the same content changes composition without changing identity.

01 Foundations · 02 Controls · 03 Content · 04 Section patterns

Header

Axes: Viewport × State. Desktop closed, mobile closed, mobile open. Mobile menu expands in flow; reserve a 48 px toggle with an accessible name. Use a compact set of links and a single primary action; preserve brand and navigation order.

DESKTOP / CLOSED · 960 PX SPECIMEN, 48 PX INSETS

A pattern library, not a required page order

Use only sections that support the visitor’s journey. The 960 px desktop specimens are compact reference compositions; scale their content region up to 1200 px on a 1440 px page. Below 768 px, stack content and keep the 48 px controls.

Frames beginning LPComponent:: are the reusable candidates. Documentation sits outside those frames. Each family shares a consistent set of variant axes; no prototype interactions or hidden breakpoint behavior is implied.
